

- Are there specific times of day when cart abandonment spikes?
14:00 in the afternoon not a clear reason why maybe a bit to few cashiers
- Is there a mismatch between cashier shift schedules and customer arrival rates?
A gap at 21:00 maybe a fault in the data 14:00 could use some more same as 16:00
- What is the average customer waiting time before they decide to abandon their cart?
Seems to be very specific 4.17 min maybe a mistake in my code not sure
- How much do price checks delay the checkout process?
Average checkout time WITHOUT price check: 3.97 minutes
Average checkout time WITH price check: 5.72 minutes
A price check delays a customer's total checkout by an average of 1.75 minutes!
